- Currently conducting Transflower Acceleration Program(TAP) program for learners to build Full Stack Developer skill with less learning curve with Project based activity using blended learning mode (live online Transflower Classroom).It is great experience to be a catalyst in learning curve of transformation from students to employable project ready Full stack Developer.
- Developed **Smart Drone system for Agriculture** using Information Technology using C#,C++, Python, Machine Learning, Device Control and building prototype for exploring Artificial Intelligence (AI) to deliver Industrial Revolution (IR4.0) hands on oriented sessions for corporates as well as educational Institutions.
- I will be happy to contribute in the areas of Leadership Development and Skill Building Process particularly in industries like Information Technology.
- Areas of expertise: Executive leadership development, Corporate Training & grooming students through Boot Camp for current IT skills.
- Love to have open mindset in talking about mentoring potential IT Professionals, working with corporates in upskilling their teams, go-to-market strategy, growth strategy and support in recruitment.
- It would be a pleasure to have constructive interaction with students, IT professionals of industry and counselling in functional shift in their career, personal career growth or mid-life career stagnation.
